ABOUT ME

Experienced Full Stack Developer with expertise in HTML, CSS, Bootstrap, Jquery, Ajax, TypeScript, RxJs and front-end frameworks such as Angular, as well as back-end technologies including PHP, Laravel and databases such as MySQL. Committed to writing clean, maintainable, and well-documented code, with strong collaboration and version control skills.

DIGITAL SKILLS

HTML / CSS / Bootstrap / Jquery / RxJs / TypeScript / PHP / Laravel / Angular / Ajax / Git / MySQL / JavaScript

WORK EXPERIENCE

Laravel Developer
DevStudio [20 Jan 2022 – Current]

City: Lahore
Country: Pakistan

Project Name : Mailboxes Shop
Technologies : HTML, CSS, PHP, Laravel
Description :
I developed APIs for authentication along with 2FA using mobile and email by using Laravel sanctum for user, roles and permissions based access of user for each module including category, menu, product and CMS management on admin side and products listing with complex sidebar filter, shopping cart, checkout management on customer side. I developed Laravel export and import functionality. I designed shopping cart pdf and email template by using HTML and CSS. I developed download pdf functionality by using the PHP/Laravel DOMPdf package. I integrated QUICKBOOK with shop to synchronize inventory of system as well.

Project Name : Humphrey & Stretton
Technologies : HTML, CSS, PHP, Laravel
Description :
I developed APIs for authentication by using Laravel sanctum. I developed roles and permissions based access of user for each module and for modules including administration, rod, phonebook, delivery-list, fsc, history, accounts, dashboard, settings and job-list. I integrated third party Sage50Accounts software with Huhpmhrey to synchronize and create autometic invoice on sage from system. I implemented real time notifications for live data. I designed an Email template using HTML and CSS to send the user for different purposes like account create, email verification code etc.

Project Name : Dalua Illumagic
Technologies : HTML, CSS, Bootstrap, JQuery, JavaScript, Ajax, PHP, Laravel
Description :
I developed APIs for authentication by using JWTAuth. I developed roles and permissions based access of user for each module and for modules including user, profile, aquariums, parameters, category, groups, devices, products, locations, schedules, share aquarium management. I developed dashboard using PHP and Laravel along with frontend using HTML, CSS, BOOTSTRAP, JQUERY, JAVASCRIPT. I developed charts and statistics for dashboard.

Project Name : HR Portal
Technologies :, HTML, CSS, Bootstrap, JQuery, JavaScript, Ajax, PHP, Laravel

Description :
I worked on HR Portal backend using PHP/Laravel along with frontend using CSS, JavaScript, Bootstrap, Jquery and Ajax. I modify the existing theme of system to new theme by retaining the backend. I worked in company letters and employee loan management modules. I developed a feature to get customized letters from system.
